

“RUN INTERCONTINENTAL”

Eurasia Marathon – Istanbul, 16 October 2011.

Nowhere else in the world can you cross a bridge that spans a waterway that unites two continents. Istanbul straddles the Bosphorus straits and has one foot on the European continent and one foot in Asia. The Eurasia Marathon starts in Asia and finishes in Europe, and this event is the only time pedestrian traffic is permitted to run (or walk) across the trans-continental bridge. When you are halfway across the bridge you are literally suspended in the air between the two continents. For this reason alone, the Eurasia Marathon is unique in the world. But it is also special for the route, which takes you past some of the greatest architectural structures in the world.

We have put together a short-stay package for the marathon – please see attached pdf. You can choose to extend this package before and after if you so wish; there are many interesting sights to visit within Istanbul itself or within hopping distance of Istanbul - Cappadocia, Ephesus, Pamukkale.

Please reply to this email for details of accommodation, or with any queries for further information.

We are your experts for Turkey. We are at your service.
